DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 1 and 2 have been considered but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knox, US 6,757, 913, previously used, in view of Kidder, U.S. Patent No. 6,363,413.

Regarding claims 1 and 2, Knox discloses a transmitting apparatus/method, an information editing apparatus/method, a receiving apparatus/method, an information storing apparatus/method, a broadcasting system/method), comprising:

a plurality of audio channel material supplying means for supplying a plurality of audio broadcast materials of audio digital data having a first sound quality; data supplying means for supplying digital data for an audio information screen corresponding to transmitted audio broadcast digital data including interactive GUI data used to generate an interactive on-screen display to allow interaction between the user and display (col. 4, lines 37-45); download audio data supplying means for supplying download audio data compressed in a predetermined compressing format, audio digital

data; multiplexing means for multiplexing the audio digital data of the plurality of audio broadcasts, the digital data for the audio information screen corresponding to the transmitted audio broadcast, and the download audio data; and transmitting means for transmitting the multiplexed data (col. 2, line 66 - col. 3, line 13 to col. 4, line 15 and col. 5, lines 3-34 and see Fig. 3).

Knox fails to disclose broadcast audio having a first sound quality and downloaded audio data has a second quality that is of superior quality to the first sound quality and transmitting means for repeatedly transmitting the multiplexed data within a program period.

In a similar field of endeavor, Kidder discloses broadcast audio having a first sound quality and downloaded audio data has a second quality that is of superior quality to the first sound quality and transmitting means for repeatedly transmitting the multiplexed data within a program period (see col. 6, line 30 to col. 8, line 33 and line 56 to col. 9, line 29).

At the time of the invention it would have been obvious to one of ordinary skill in the art to modify Knox to include broadcast audio having a first sound quality and downloaded audio data has a second quality that is of superior quality to the first sound quality and transmitting means for repeatedly transmitting the multiplexed data within a program period for the increasing the effective bandwidth of video sequences/audio transmitted over a network as taught in Kidder.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
